

BioEscalator Gateway Criteria

The BioEscalator is home to some of the most pioneering start-ups in the medical and life sciences sectors. Our tenants share a commitment to innovation, a drive to translate discoveries into clinical solutions, and a passion for collaboration. To join this vibrant ecosystem, your company must meet the following gateway criteria:

- **Innovative Science:** Your company is built on early-stage, cutting-edge science with the potential to substantially impact healthcare, in its broadest sense.
- **University Connection:** A meaningful overlap exists between your company's work and the University of Oxford's research. Being connected to our research is essential. If you see potential for collaboration but haven't yet established the right connections within the University, we can help facilitate introductions.
- **Growth Potential:** Your company demonstrates strong growth potential with an ambitious trajectory.
- **Focus:** The company is not a contract research organisation (CRO).

If you believe your company meets these criteria or would like to discuss them further, please contact us [here](#).
